Helping architects and interior designers visualise, specify and realise decorative finishes.

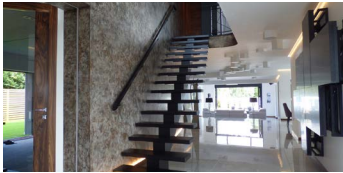

Our Approach 03-04

Contemporary architecture shaped through handcrafted decorative finishes, created in collaboration with architects, interior designers and developers.

Urban Interiors 05-12

Working discreetly behind the scenes, we collaborate with architects, interior designers and contractors throughout the specification process. We realise the design vision with precision and craftsmanship.

Residential Interiors 13-18

Finishes that feel as individual as the people who live within them. Every project is developed alongside the wider design team to create interiors that balance elegance, comfort and enduring craftsmanship.

Commercial Interiors 19-28

Hotels, restaurants, wellness spaces and commercial environments demand durability and atmosphere. Our handcrafted finishes contribute to spaces designed to leave a lasting impression.

Material Solutions 29-34

VPS's extensive product range will allow your concept to become a reality, the possibilities are endless from our venetian plasters in the traditional vernacular to the strong contemporary edge of our bespoke textured finishes.

THEMED DESIGN & DELIVERY

The most successful decorative finishes are specified from the outset. By engaging Venetian Plaster Studio during the concept and design stage, architects, interior designers and specifiers gain access to specialist expertise that helps integrate bespoke surface finishes seamlessly into the overall scheme.

We provide material guidance, finish recommendations, budget pricing and technical advice early in the project, ensuring decorative finishes are fully considered before construction begins. This approach reduces costly design changes and gives clients confidence that the chosen finish can be delivered exactly as envisioned.

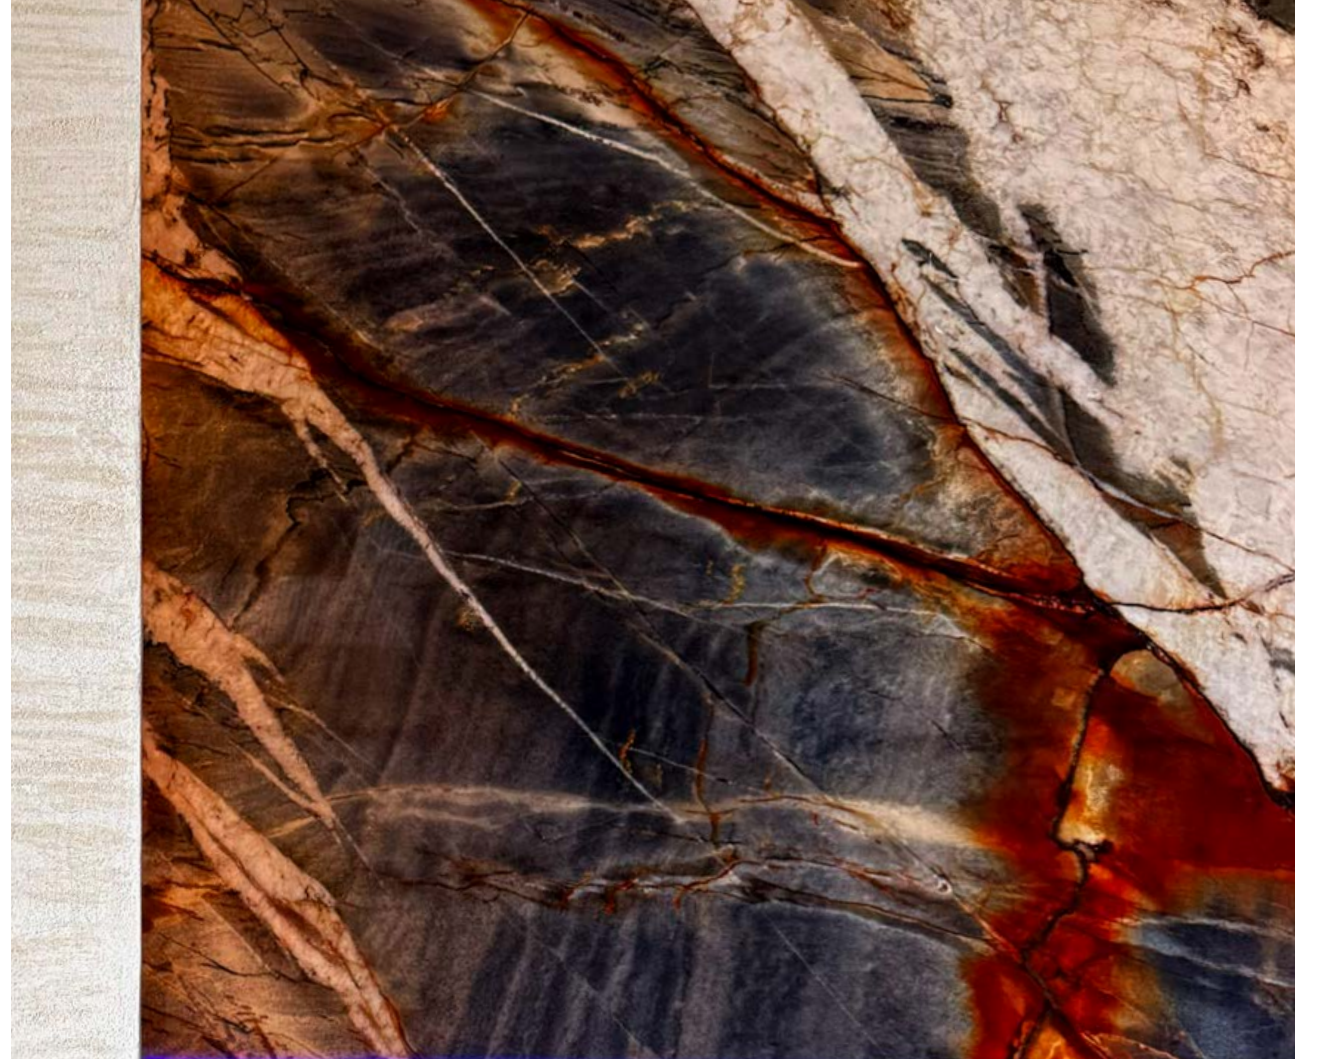

To support design presentations and client approvals, we can also produce high-quality visual simulations, applying our proposed venetian plaster and decorative finishes directly onto your photographic renders, CGIs or site imagery. This allows clients to accurately visualise the finished result before specification, helping to streamline approvals and create complete confidence in the design.

Finishing That Endures

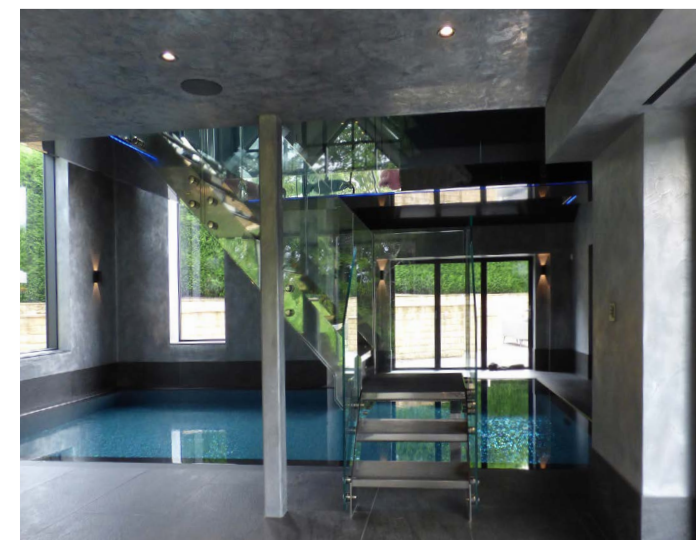

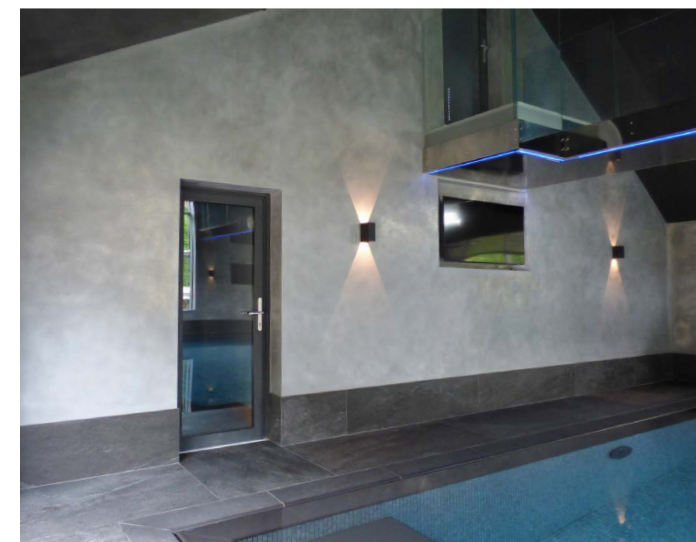

Surface texture has the power to influence atmosphere, soften light and create visual interest without overwhelming a space. Carefully applied decorative finishes become that integral part of the architectural experience. By combining traditional craftsmanship with contemporary design, we create timeless decorative finishes that continue to enrich the spaces they inhabit.

Designed Around Light

Natural and architectural lighting transform decorative surfaces throughout the day, revealing subtle movement, tonal variation and craftsmanship within every finish. The result is an interior that evolves with its surroundings and rewards every glance.

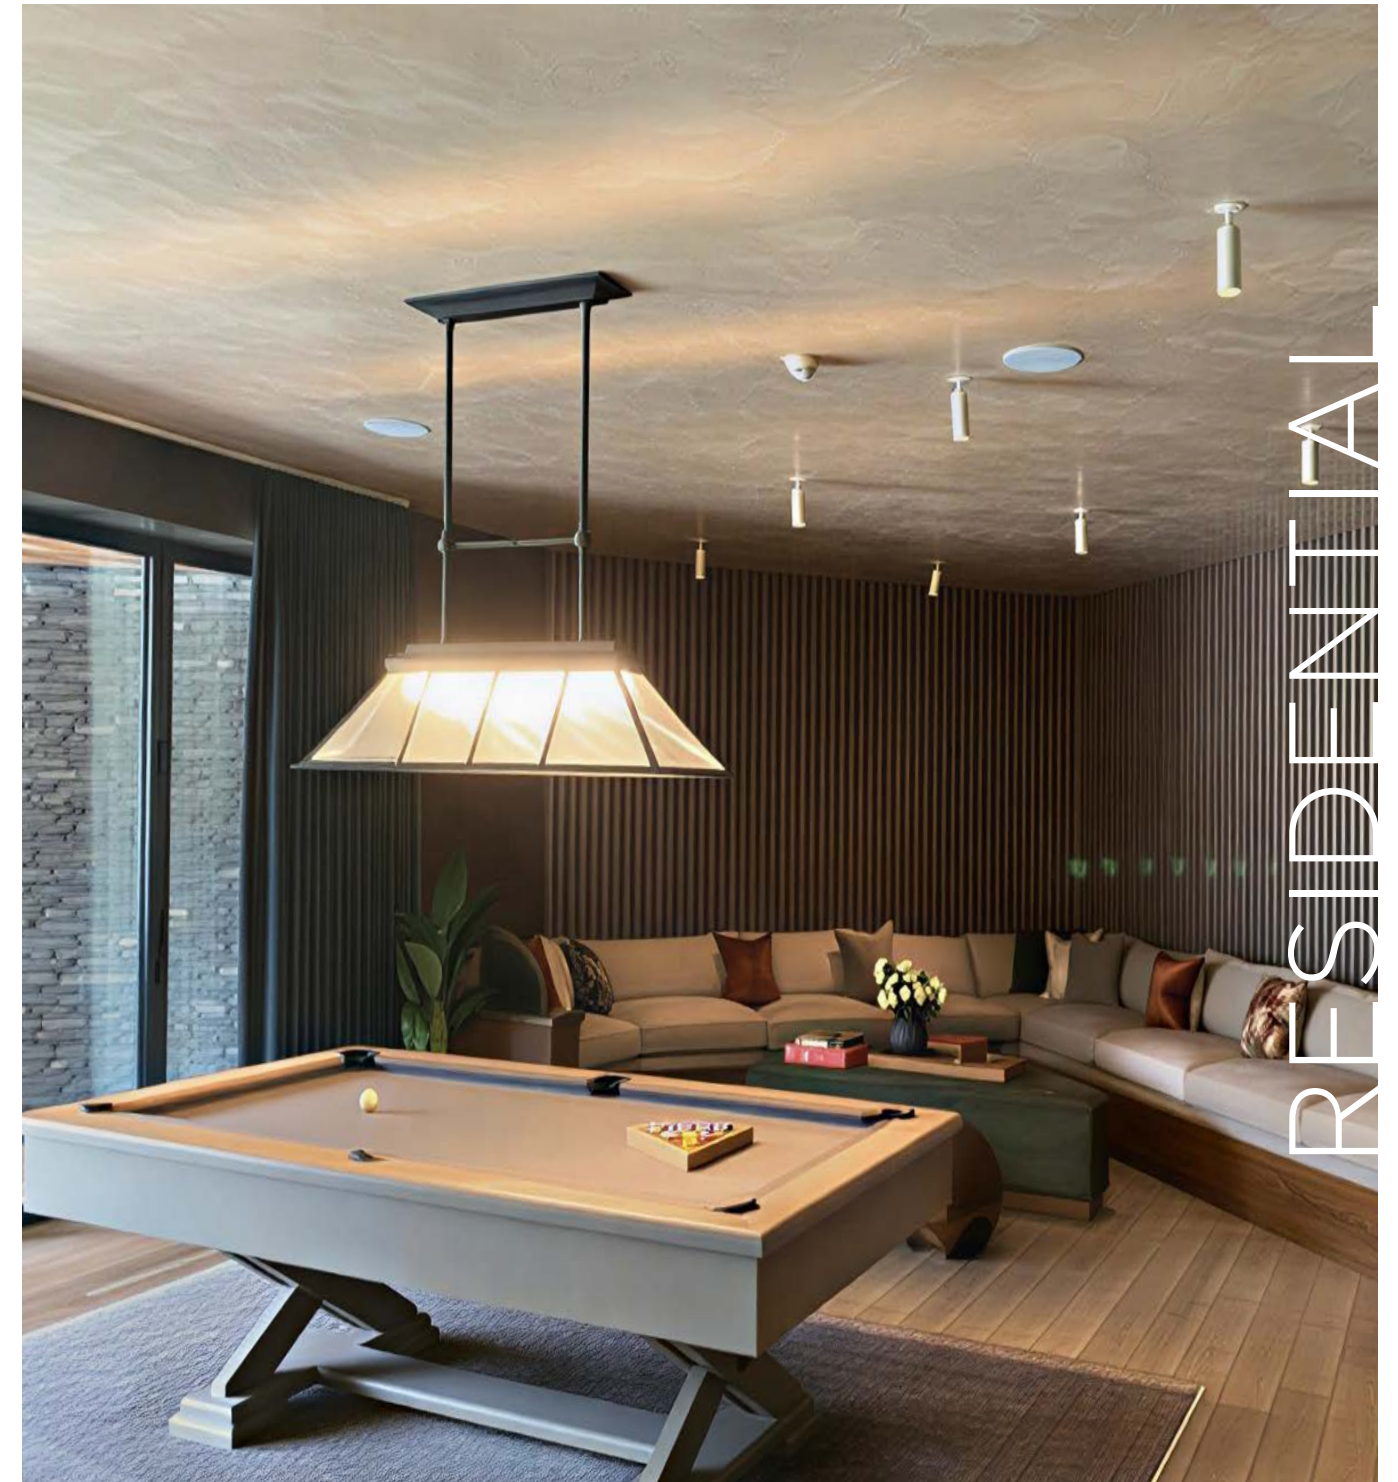

Material With Meaning

Every commission begins with a conversation. Through early collaboration, visualisation and technical guidance, we help transform design concepts into beautifully realised interiors, ensuring every finish is considered long before installation begins.

Crafted For Individual Homes

Exceptional homes deserve finishes that feel as individual as the people who live within them. Every project is developed alongside the wider design team to create interiors that balance elegance, comfort and enduring craftsmanship.

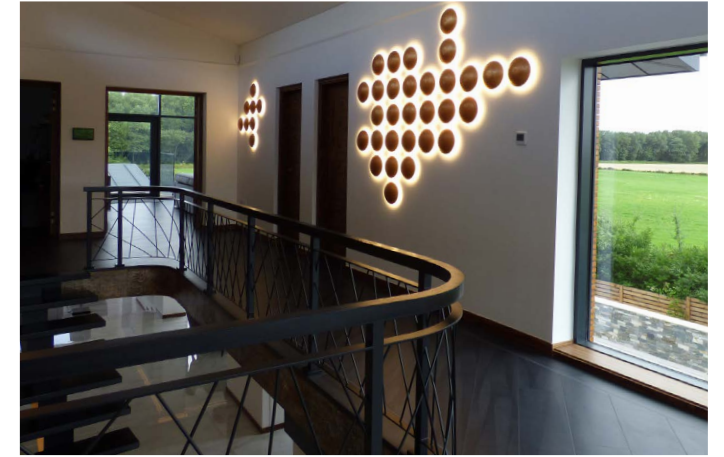

RESIDENTIAL

Designed Without Compromise

Every decorative finish is individually crafted to reflect the aspirations of the client while remaining faithful to the architectural vision established by the design team.

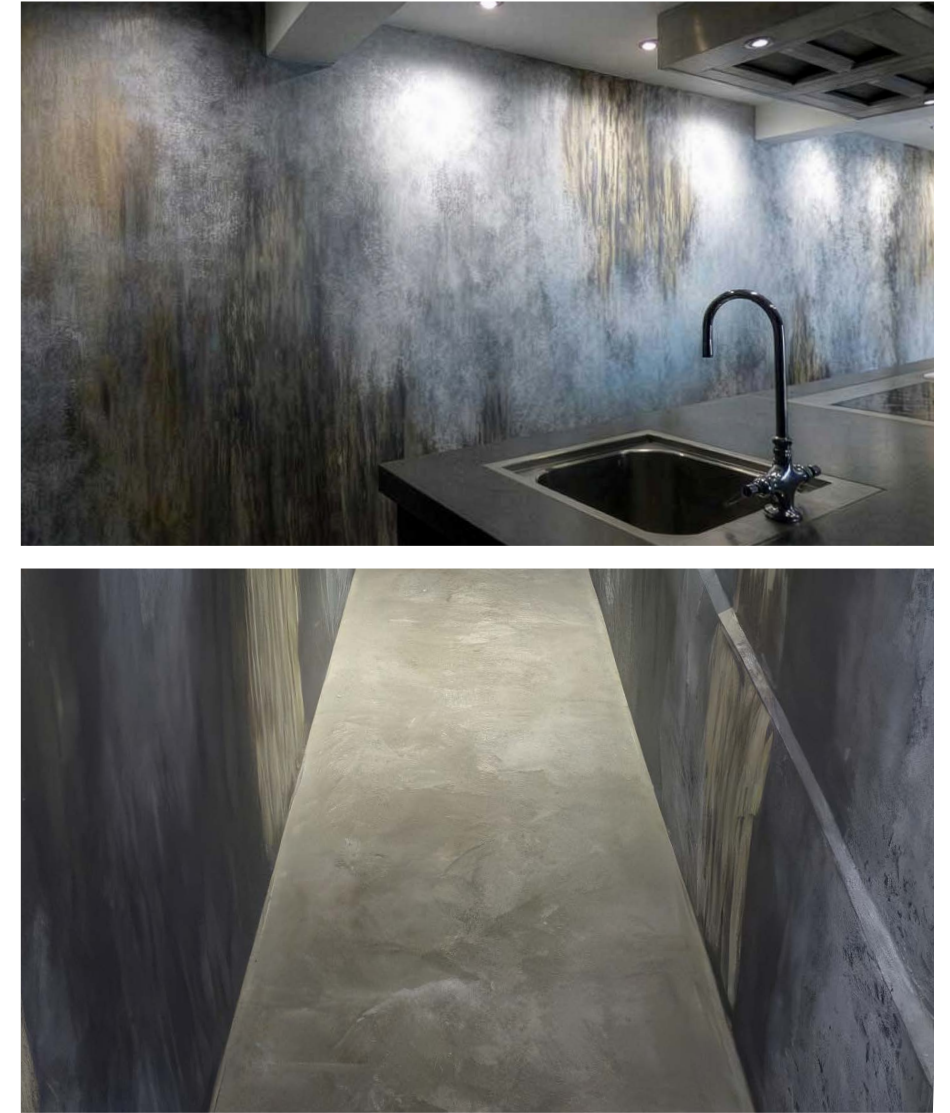

Visualising Beautiful Interiors

Whether working from photographs, interior concepts or architectural plans, our visualisation service allows designers and homeowners to experience the finished space before installation begins.

We had a shared ambition to create a refined, contemporary space. This handcrafted decorative finish is perfect, bringing texture and atmosphere for my guests.

COMMERCIAL

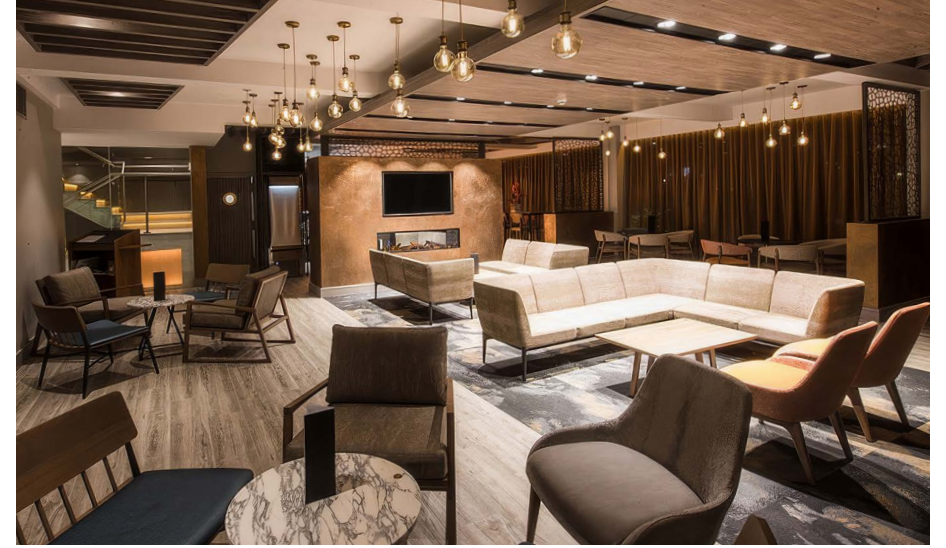

Creating Memorable Destinations

Hotels, restaurants, wellness spaces and commercial environments demand more than durability—they require atmosphere. Our handcrafted finishes contribute to spaces designed to leave a lasting impression.

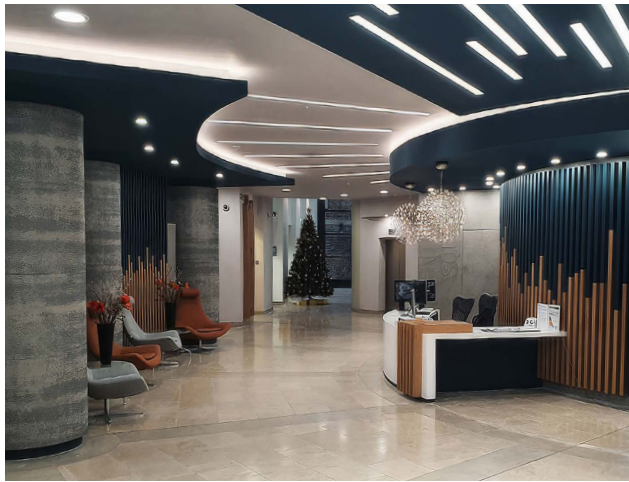

Supporting Specification

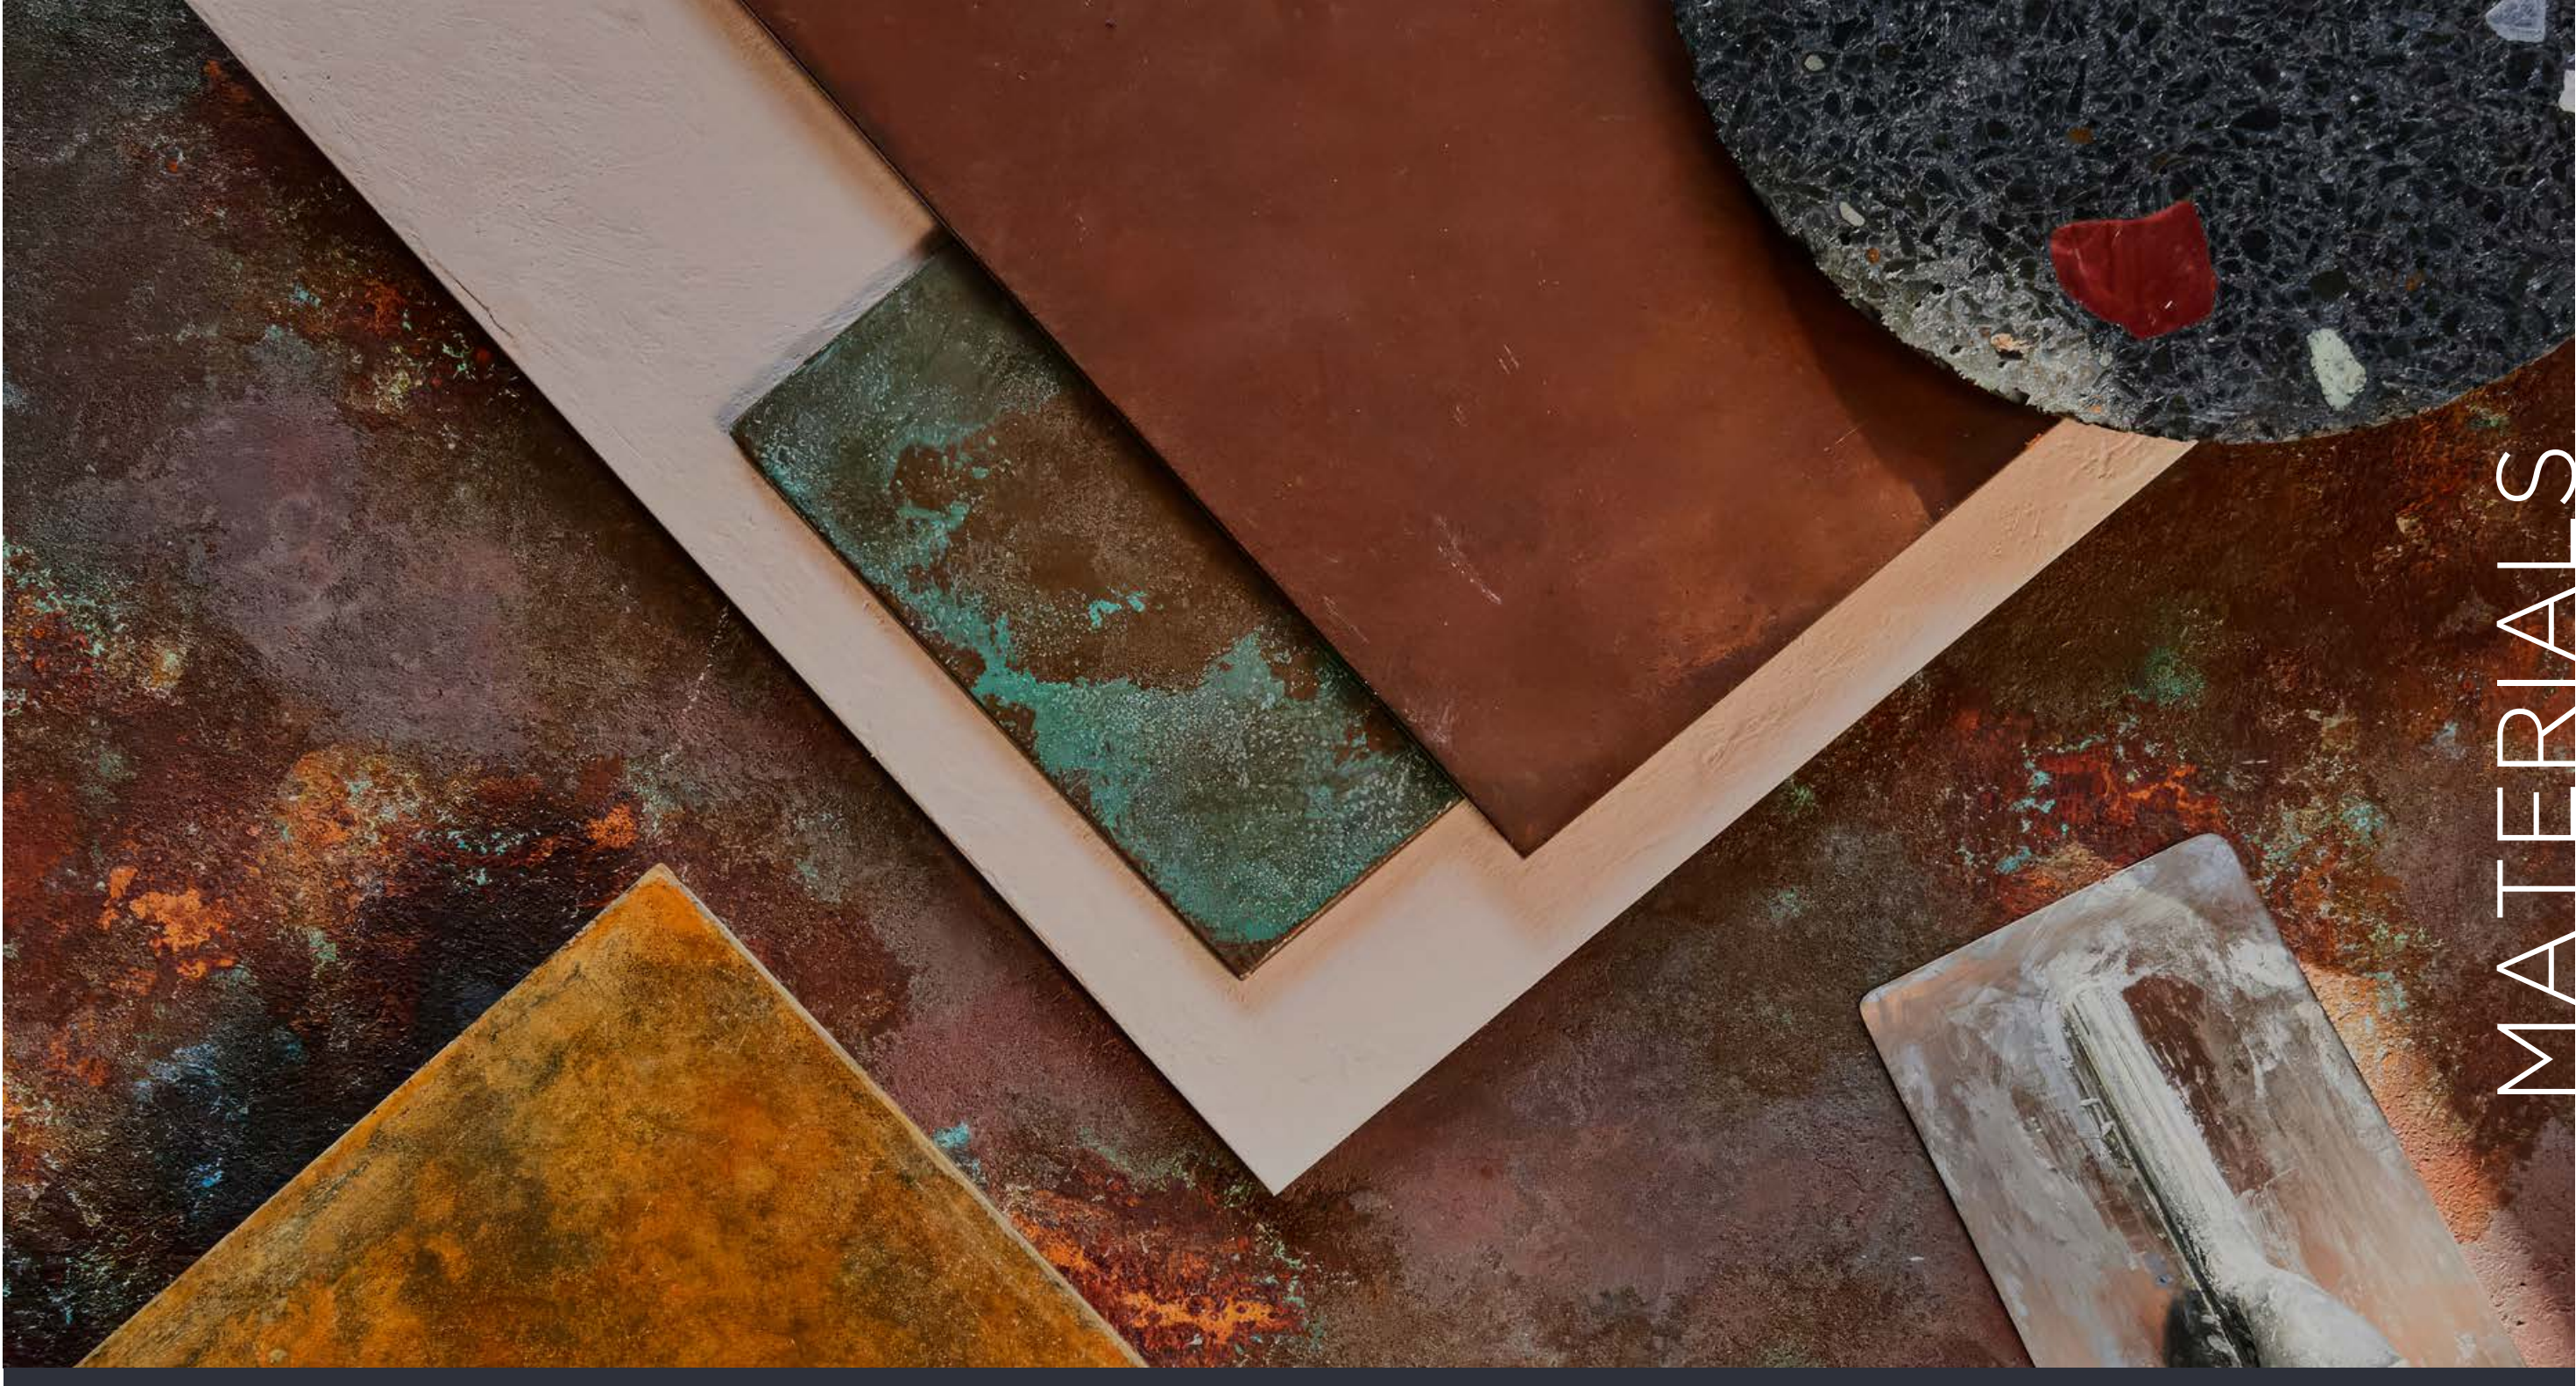

We work with design professionals throughout the specification process, providing technical advice, finish recommendations and visual presentations that simplify approvals and strengthen client confidence.

A Trusted Creative Partner

Our involvement extends beyond installation. By collaborating throughout the design journey, we help architects, interior designers and developers realise their vision through carefully considered decorative finishes and meticulous craftsmanship.

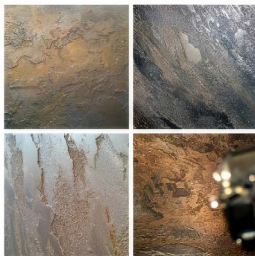

MATERIALS

VENETIAN PLASTER FINISHES

Veined Stucco Veneziano

This is a bespoke product. Our technique of veining is created by hand drawing strands of pigments through the plaster mix. Stucco Veneziano mix is then trowelled on in layers and randomly cutting back to a previous layer to achieve visibility of the veins.

Cara De La Rocca

Created by our in house craftsmen with the key features being TOUCH and FEEL. A polymer coating consisting of fibres, aggregates and other fine elements that builds to a 2-3 mm surface. A specialist paint effect is then applied, using metallic paints to achieve these dramatic effects.

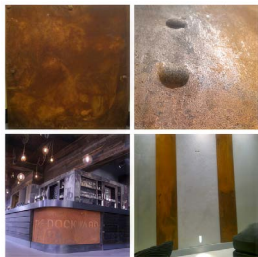

Marmorino Venezia

Used on both internal and external areas. Marmorino Venezia is a strong product which boasts excellent durability and good resistance to humidity and moulds, making this the ideal product for any wet areas like Showers, Swimming Pool areas or high traffic areas such as staircase walls.

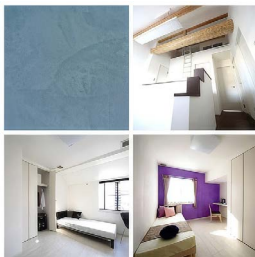

Stucco Antico

Stucco Antico is a pure slaked lime with additives and then filtered, suitable for thin and brush finish coverings with a shiny effect on lime base plaster and various bases which are appropriately prepared for interiors.

DeCorten Rust

DeCorten is a metallic paint that creates the particular "corten steel" effect, and it can be used both internally and externally, can also be applied to work surfaces, Bar areas, table tops, doors etc.

Marmorino Naturale

One of the product's distinctive characteristics is its essentially mineral composition, according to the traditional rules of preparation for smoothing exterior and interior plasters, used in the past by master artisans.

Stucco Da Vinci

Suitable for achieving brush finishes on lime based plaster and various bases. Its modern production techniques guarantee excellent workability, easy polishing, resistance, excellent ability to breath and better colour performance with compatible pigments.

Edel decor Riviera

The product is a paste ready to use, which can be spread in an even or an irregular coat, you can have a different final effect as 'rustic, brushed, spatula, crocodile effect, snakeskin effect and woodgrain effect.

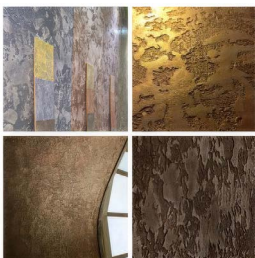

Marmorino Venezia Beton

Marmorino Venezia Beton is a mixture of particular selected marble powders mixed with other mineral ingredients, lime & various additives. Its characteristic marmorino plaster was employed centuries ago to create important villas and palaces.

Marmorino Pasta Media

The Marmorino Pasta Media is a mixture of particular and seloctioned dusts and marble grits with other mineral ingredients with prevalence lime and other different additives which facilitate and guarantee an excellent anchorage to the support.

Metallique

Metallique is an excellent replacement for traditional solvent-based metallic enamel paints. This product offers a luxurious feel and look to any internal or external area.

Mirage & Mirage Rustico

Mirage is an interior decorative finish characterised by an acrylic resin base and metallic pigments that guarantee velvet colour solutions with a changing light effects.

Marmorino Roma

The Marmorino Roma is a mixture of particular and selected dusts and marble grits with other mineral ingredients with prevalence lime and other different additives which facilitate and guarantee an excellent anchorage to the support.

Marmorino Venezia Travertino

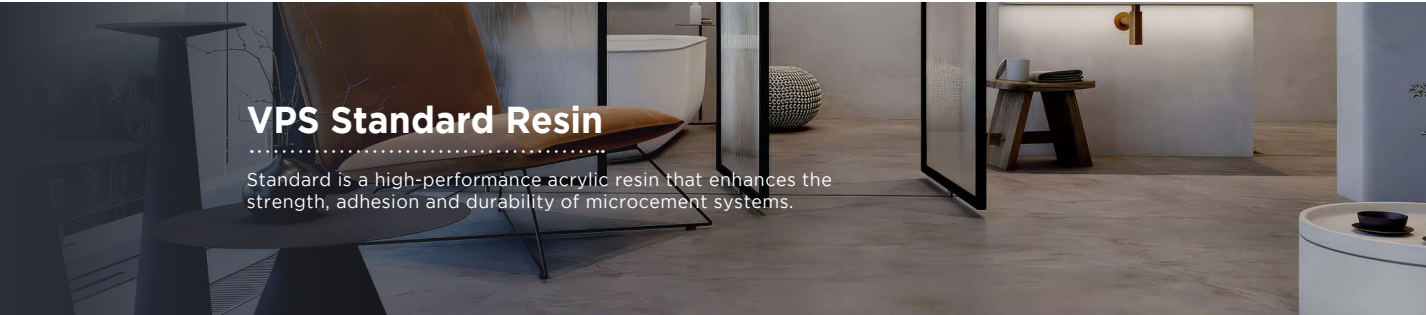

Marmorino Venezia Travertino is a mixture of particular selected marble dusts and marble grits mixed with other mineral ingredients, lime & various additives.

Marmorino Tintoretto

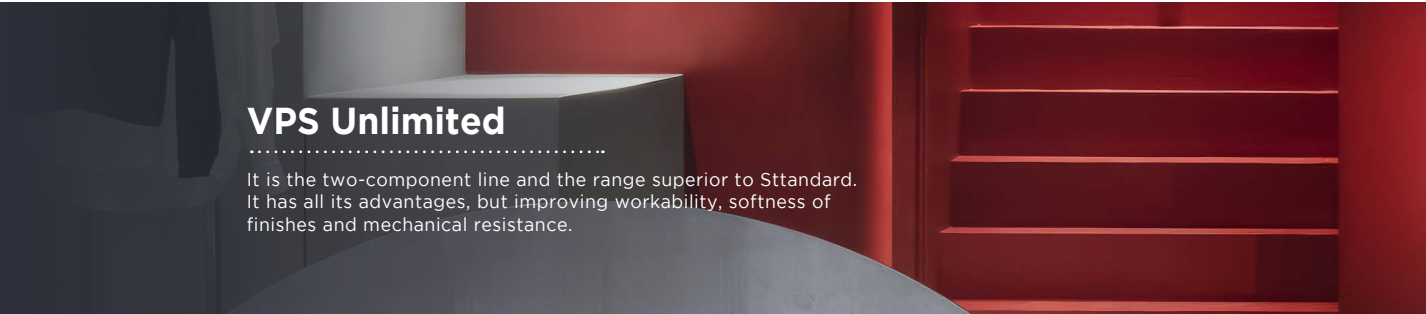

This is a lime based decorative plaster finish. Enhanced with Gold, Silver or Bronze flakes, especially recommended for decorating quality internal and external walls. Marmorino Tintoretto comes in 3 NEUTRAL BASES containing GOLD, SILVER or BRONZE coloured flakes.

MICROCEMENT FINISHES

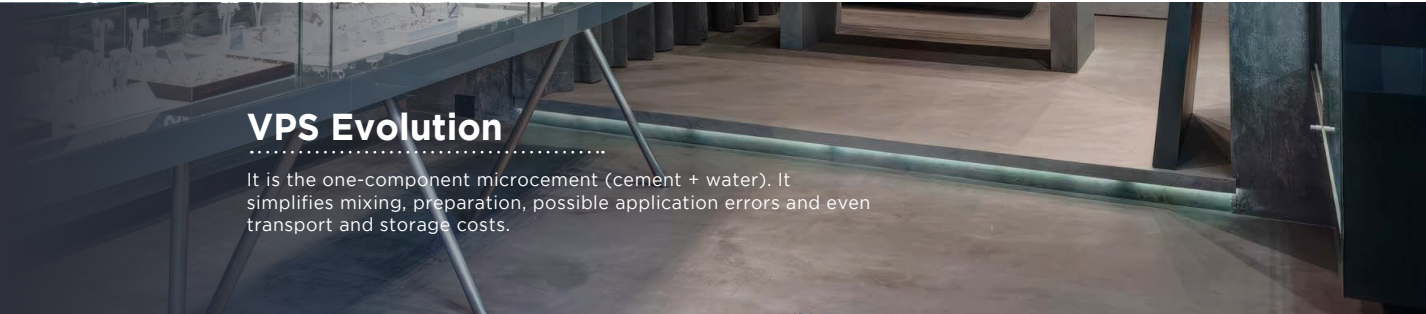

VPS Standard Resin

Standard is a high-performance acrylic resin that enhances the strength, adhesion and durability of microcement systems.

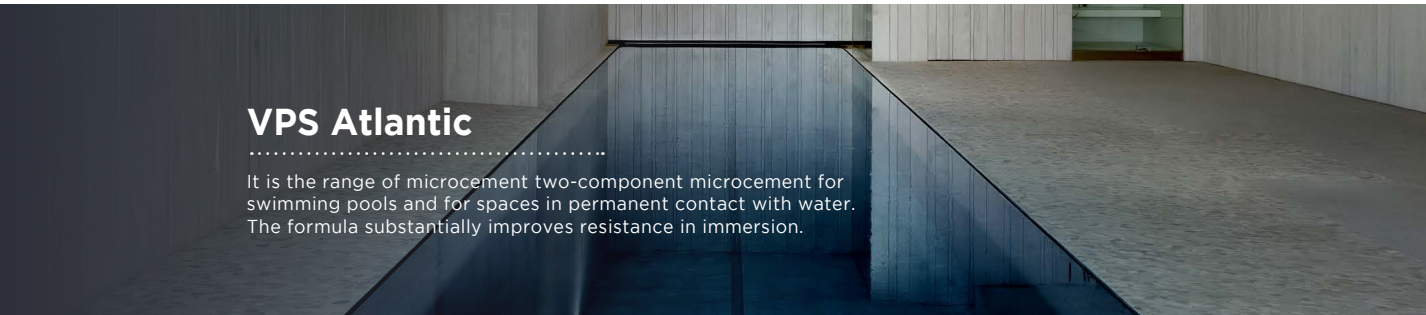

VPS Unlimited

It is the two-component line and the range superior to Standard. It has all its advantages, but improving workability, softness of finishes and mechanical resistance.

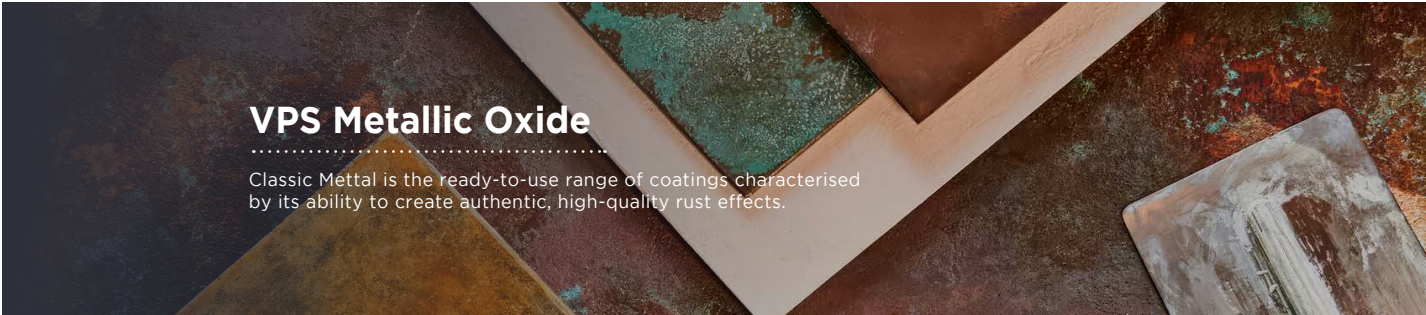

VPS Evolution

It is the one-component microcement (cement + water). It simplifies mixing, preparation, possible application errors and even transport and storage costs.

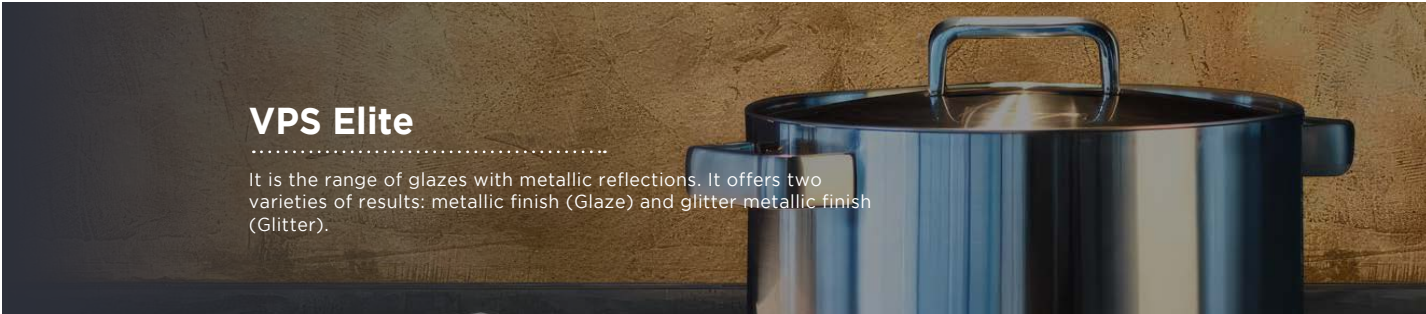

VPS Atlantic

It is the range of microcement two-component microcement for swimming pools and for spaces in permanent contact with water. The formula substantially improves resistance in immersion.

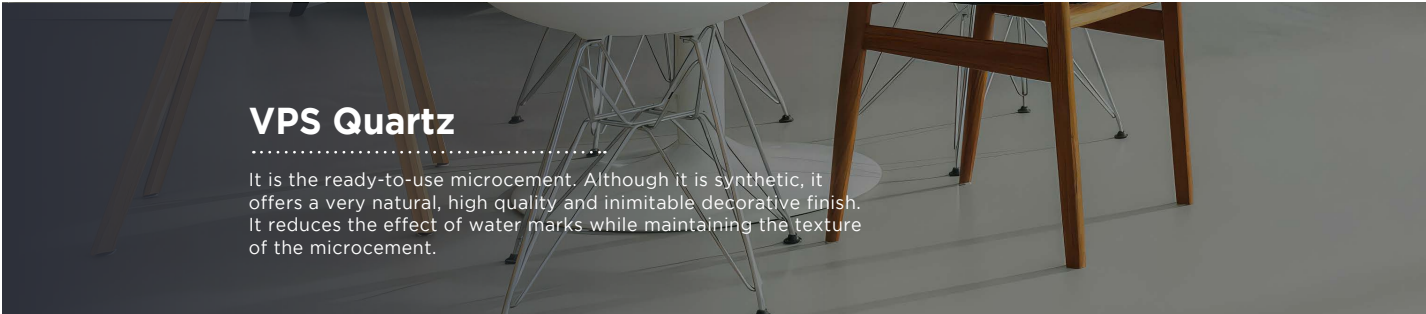

VPS Metallic Oxide

Classic Mettal is the ready-to-use range of coatings characterised by its ability to create authentic, high-quality rust effects.

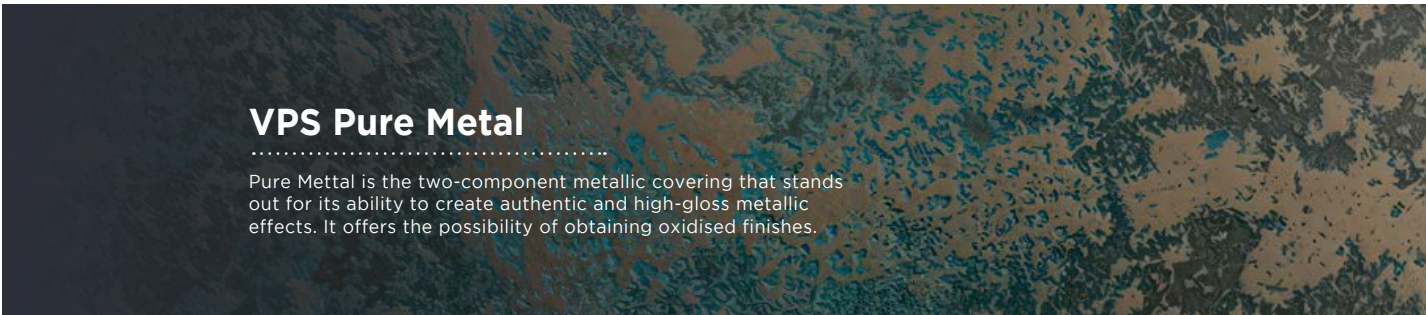

VPS Elite

It is the range of glazes with metallic reflections. It offers two varieties of results: metallic finish (Glaze) and glitter metallic finish (Glitter).

VPS Quartz

It is the ready-to-use microcement. Although it is synthetic, it offers a very natural, high quality and inimitable decorative finish. It reduces the effect of water marks while maintaining the texture of the microcement.

VPS Pure Metal

Pure Mettal is the two-component metallic covering that stands out for its ability to create authentic and high-gloss metallic effects. It offers the possibility of obtaining oxidised finishes.
